

Senior Hydrocarbon Accountant

Company Overview

NEO Energy is an independent full-cycle energy business in the UK Continental Shelf (UKCS). We combine value creation from the prospective North Sea basin with our commitment to be a responsible and efficient business. We operate a high-quality asset base with significant scope to grow production organically by extending asset life. Our ambition is to be one of the top five producers in the UKCS, with a target of 100,000 boepd in 2022 and continued growth beyond.

Reports To

Hydrocarbon Accounting Lead

Job Overview

The Senior Hydrocarbon Accountant will be responsible for the accurate management of all production data from wellhead to point of sale on behalf of NEO Energy. Developing Allocation & Hydrocarbon Accounting processes, building and maintaining appropriate systems, writing procedures and standards for a developing UKCS E&P business looking to grow rapidly both organically and inorganically.

In addition, the role will be responsible for the reporting of verified production data accurately and will understand the data flow throughout the value chain and how it is used by the business, This position will report into the HCA Lead and will be a contributor to the management reporting for NEO Energy.

Roles and Responsibilities

- Responsible for:
 - Review of production and allocation data received from operated and non-operated assets and third parties; investigating anomalies to ensure the accuracy and validity of the data; raising where appropriate with third parties and ensuring that all adjustments are accounted for in the business revenue forecasting and accounting processes;
 - The development of the NEO Energy Allocation system (EnergySys) will allow incorporation of new fields through acquisition or organic growth and for inter-field interactions (e.g. backout) and retiral of legacy systems;
 - Specification and testing of any new development or changes required to allocation systems to satisfy ongoing business requirements;
 - Where issues are identified – investigate and assist with identification of appropriate solutions in order to meet applicable commercial or regulatory requirements;
 - Ensuring that NEO Energy data across the value chain, from wellhead production to point of sale is available, auditable and traceable for business and regulatory reporting purposes;

- Ensuring that NEO Energy meets all regulatory and JV production reporting requirements in accordance with regulatory or commercial agreements (as may be amended from time to time);
- Preparation of hydrocarbon and water production for use in environmental reports relating to offshore emission or discharges in compliance with the requirements of the business or regulatory bodies;
- Ensuring that information systems are operated to the required standard (in accordance with industry guidance) to maintain accurate and secure records;
- Ensuring an audit trail is in place to meet internal and external audit requirements in respect of data used for regulatory production reporting, hydrocarbon sales transactions or other regulatory requirement;

Key knowledge and experience

- Ability to contribute to the development of allocation systems and processes to support rapid expansion of NEO Energy.
- Commercial awareness, communication skills and a team player.
- Understanding of offshore oil & gas production, transportation and onshore processing systems and associated allocation systems.
- In depth knowledge of regulatory guidance and standards relating to production reporting, emissions and discharges.
- Understanding of multi-field pipeline operations and commercial agreements including (but not limited to) Joint Operating Agreements, Unitisation and Unit Operating Agreements, JV Operating Agreements, Transportation and/or Processing and Operating Agreements, Allocation and/or Measurement Agreements.

Education

- Qualified in a business/commercial/numerate discipline.
- Significant and proven experience in a senior Allocation and Hydrocarbon Accounting role.
